

DataPublisher from start to finish...

So what happens to my INSPIRE data?

1. Once you have purchased DataPublisher we will send you an email with your miso portal account details and open your dataslots so you can get cracking.

2. You then simply log into the portal and drag and drop your data & metadata onto your slots to upload them and tell us if any are restricted... and the rest is up to us!

3. Our automated service processes your data & metadata and publishes it all to data.gov.uk with a view and download service - making you INSPIRE compliant.

4. We then confirm via the portal that your data & metadata are live on data.gov.uk

But what about restricted data?

5. If you have restricted data listed on data.gov.uk and somebody requests access to it, we will notify you by email of the request so you can evaluate it...

6. ...you can login and see their name, organisation and reason for the request and choose to accept or decline - all from within the portal. We also keep a log of all requests so you can meet any audit requirements.

7. If you accept the request, the person who made it will receive an email with the WFS download link and instructions - job done. If you decline they are notified by email of your decision.

Stuck on metadata?
